

THE *LANCET*'S STILLBIRTH SERIES

INTRODUCTION

The *Lancet Medical Journal* published the *Lancet's Stillbirth Series* on Thursday 14th April 2011. Simultaneous launches were held in London, New York, and Hobart in partnership with the Lancet, the International Stillbirth Alliance and its member organisations, World Health Organisation, Save the Children, UNCIEF and UNFPA. Funded by the Bill and Melinda Gates Foundation, this series aims to prioritize stillbirth in the context of maternal, child and newborn survival with the overall goal of bringing together epidemiology, evidence for interventions, costing estimates and policy analysis to guide decision making and promote action with measurable change by 2020. For a overview of the Lancet's Stillbirth Series please visit [here](#)

To access the six papers, two articles and eight comments please visit [here](#).

The purpose of this website is to provide interested parties support when communicating the key messages published in the *Lancet Stillbirth Series*

. We hope this will help the important global health issue of stillbirth receive the attention it deserves. To access your publicity guide please visit [here](#)
