# The Ending Preventable Stillbirths Scorecard: Global (2019)

Call to action	Indicator	Global		High-burden countries		Africa		Asia		Latin America	Europe	
		2018	2019	2018 (n=74)	2019 (n=90)	2018 (n=44)	2019 (n=49)	2018 (n=30)	2019 (n=35)	2019 (n=3)	2019 (n=3)	
Mortality targets by 2030	12 stillbirths or fewer per 1000 total births in every country by 2030	<b>1.1 Countries with Newborn Plan</b>			81%	89%	73%	63%	93%	91%	66%	100%
		<b>1.2 Countries with stillbirth rate target</b>			23%	31%	16%	33%	30%	34%	0%	0%
		<b>1.3 Countries achieved stillbirth rate global target</b>	48%	53%	23%	29%	7%	8%	47%	45%	100%	100%
	All countries set and meet targets to close equity gaps and use data to track and prevent stillbirths by 2030	<b>1.4 Countries with subnational Newborn Plan</b>			31%	26%	30%	22%	30%	31%	33%	0%
		<b>1.5 Countries with stillbirth rate equity target</b>	No data	No data	No data	No data	No data	No data	No data	No data	No data	No data
		<b>1.6 Countries reporting subnational SBRs</b>	No data	No data	No data	No data	No data	No data	No data	No data	No data	No data
UHC: Family planning	By 2020, 120 million more women and girls with access to contraceptives	<b>2.1 Additional users of modern methods of contraception</b>	38,880,000	46,490,000								
	By 2030, universal access to sexual and reproductive health-care services and integration of reproductive health into national strategies and programmes	<b>2.2 Percentage demand for contraception satisfied</b>	68%	68%	54%	53%	48%	53%	62%	53%	90%	
		<b>2.3 Countries with reproductive health plan</b>	No data	No data	No data	No data	No data	No data	No data	No data	No data	No data
UHC: Antenatal care	By 2030, universal quality of care and comprehensive antenatal care for all women	<b>2.4 Availability of global standards for antenatal care</b>	Achieved	Achieved								
		<b>2.5 Antenatal care</b>	62%	62%	56%	56%	50%	53%	59%	58%	87%	60%
		<b>2.6 Quality of antenatal care</b>	No data	No data	No data	No data	No data	No data	No data	No data	No data	No data
UHC: Intrapartum care	By 2030, effective and respectful intrapartum care to all women in all countries	<b>2.7 Global standards for intrapartum care</b>	Achieved	Achieved								
		<b>2.8 Skilled birth attendants</b>	78%	78%	73%	73%	57%	57%	81%	83%	99%	99%
		<b>2.9 Quality of intrapartum care</b>	No data	No data	No data	No data	No data	No data	No data	No data	No data	No data
Milestones	Every Newborn global and national milestones met by 2020, including the Measurement Improvement Roadmap	<b>3.1 MNH quality improvement</b>			53%	60%	48%	55%	60%	63%	67%	100%
		<b>3.2 Perinatal Death Review systems</b>			50%	53%	52%	49%	47%	57%	67%	33%
		<b>3.3 Research focusing on stillbirths planned by country</b>			27%	44%	20%	37%	37%	48%	100%	67%
	Respectful care, including bereavement support after a death: by 2020, global consensus on a package of care after a death in pregnancy or childbirth for the affected family, community, and caregivers in all settings	<b>3.4 Respectful care after a death</b>	Ongoing research to inform global consensus	Ongoing research to inform global consensus								
		<b>3.5 Reduce stigma</b>	No data	No data	No data	No data	No data	No data	No data	No data	No data	No data

**Legend:** Achieved, On track, Making progress, Slow/no progress, No data; blank cells mean the indicator is not applicable in this setting.

n, number of countries; SBR, stillbirth rate; MNH, maternal and newborn health; UHC, universal healthcare. Created by the Stillbirth Advocacy Working Group, [www.stillbirthalliance.org](http://www.stillbirthalliance.org)
